

What is Claimed is:

1. A detachable restoration tooth, comprising:
 - a bottom provided with a cavity extending into the interior of said detachable restoration tooth and to accommodate an outer crown:
 - an outer surface having a boundary edge in relation to said bottom; and
 - a top having two boundary edges in relation to the outer surface whereby said top is provided with two connection portions, and each extending from one of said two boundary edges.
2. A detachable restoration tooth, as recited in claim 1, wherein said two connection portions of the top are attached to the top of two healthy teeth adjoining a restored tooth.
3. A detachable restoration tooth, as recited in claim 1, wherein said connection portions are attached to a projection of the side of two healthy teeth adjoining a restored tooth.
4. A detachable restoration tooth, as recited in claim 1, wherein said connection portions are provided with a lateral connection portion.
5. A detachable restoration tooth, comprising:
 - a bottom provided in one side thereof with a cavity extending into the interior of said detachable restoration tooth and to accommodate an outer crown, and in other side thereof with a protruded portion;
 - an outer surface having a boundary edge in relation to said bottom; and
 - a top having two boundary edges in relation to the outer surface whereby said top is provided with two connection portions, and each extending from one of said two boundary edges.

6. A detachable restoration tooth, as recited in claim 5, wherein said two connection portions of the top are attached to the top of two healthy teeth adjoining a restored tooth.

7. A detachable restoration tooth, as recited in claim 5, wherein said connection portions are attached to a projection of the side of two healthy teeth adjoining a restored tooth.

8. A detachable restoration tooth, as recited in claim 5, wherein said connection portions are provided with a lateral connection portion.
